Letter of Reference

This is a letter of reference for Mr. Le Huu Thang (born April 4, 1998 in Ho Chi Minh City, Vietnam). My assistants and I have known Mr. Le Huu Thang since the summer semester of 2022. He studied in the M. Sc. program “Computer Science” at the University of Passau and successfully attended the lecture courses “Coding Theory” (delivered by Dr. Le Ngoc Long), “Mathematical Logic” (delivered by Dr. John Abbott), and “Computer Algebra” (delivered by Dr. Le Ngoc Long). In all these courses his marks were good to very good. Furthermore, in 2024 Mr. Le Huu Thang wrote his Master thesis under my supervision which was titled “Implementation and Analysis of the Game Chomp” and received a final mark of 1.7 (good plus).

Based on these experiences, I can attest to Mr. Le Huu Thang’s high levels of proficiency in various programming languages such as C++, C#, and Python, as well as his skillful applications of several high-level programming techniques related to both achieving a very high code efficiency and a nice and easily usable game interface.

Moreover, during his thesis work, Mr. Le Huu Thang proved his high capacity to learn and master new mathematical theories and techniques, and to grow both as a computer scientist and as a mathematician. He displayed very good skills in problem solving, an excellent work ethic, and a high degree of independence.

His thesis was written clearly and in a high-level English. With his very efficient implementations Mr. Le Huu Thang was even able to discover some new mathematical patterns. In my opinion, Mr. Le Huu Thang is highly qualified to be a valuable employee in any software engineering or software development related environment.

Respectfully,

Martin Kreuzer
